Bulletin #11 of 2023. December 19, 2023

CHANGE TO PRODUCT BULLETIN

P/N 560-542 Stepped Ring, Stainless Steel Now Has Rounded Edges

Products Affected: All KMDSI helmets **EXCEPT** the SL 17B.

The P/N 560-542 stainless steel Stepped Ring now features an angled tongue and rounded leading edges. The increased angle of the tongue aids in the removal of the Neck Ring Assembly when the diver is topside, and the rounded leading edges increase comfort when handling.

Increased angle on tongue aids in the removal of the Neck Ring Assembly.

The current stainless steel stepped ring with rounded leading edges increases comfort when handling.

There will be no exchanges offered. The part number will remain the same, and there will be no change to the associated procedures for the maintenance of the stainless steel Stepped Ring necessary.

Kirby Morgan will install the updated stainless steel Stepped Ring on all future production of our bottom-end helmets, including all of the KMDSI models **EXCEPT** the SL 17B.

Any old 560-542 Stepped Ring stock, Stainless Steel may be used without issue.

Please contact your authorized KMDSI dealer or e-mail sales@kirbymorgan.com for more information.
